

# JuiceStand™

Designed for Convenient Residential EV Charging

## Flexible and Convenient Installation at Home

Convenient and durable, JuiceStand is the perfect companion for any JuiceBox smart home charging station. JuiceStand allows electric vehicle drivers the flexibility to mount and install the JuiceBox wherever they may need it at home. Its compact size is perfect for residences where wall space may be limited or residences with long driveways or under a carport.

- **Flexible Design & Power:** Mounts one JuiceBox charging station from 32 amp, 40 amp, or 48 amp outputs.
- **Easy Installation:** Save on installation with a cost-effective ground-mounted charging station.
- **Industrial Design:** Robust steel-construction stand is designed for durability in all-weather conditions.
